

IMPRS-LS Lecture Series

Thursdays 17:00

Jan 23

| | | |
|----|--|---|
| 12 | Peter Becker LMU – Biomedical Center | Non-canonical function of a long, non-coding RNA involved in chromatin regulation |
| 19 | Magdalena Götz LMU – Biomedical Center | Novel mechanisms of neurogenesis and repair |
| 26 | Jürgen Cox MPI of Biochemistry | Computational proteomics for the masses |

Feb 23

| | | |
|----|---|--|
| 02 | Ruben Portugues TUM | Navigation in larval zebrafish: strategies and internal representations |
| 09 | Veit Hornung LMU – Gene Center | Danger and damage - How the innate immune system detects non-self |
| 16 | Fabiana Perocchi Helmholtz Zentrum | Reconstruction of mitochondrial signaling networks: from genes to diseases |
| 23 | Rüdiger Klein MPI for Biological Intelligence | An embarrassment of riches – how to deal with the overabundance of different neuron types in the brain |

Mar 23

| | | |
|----|---|--|
| 02 | Christoph Turck MPI of Psychiatry | From -omics via molecular pathways to disease biosignatures |
| 09 | Anneli Peters LMU – Biomedical Center | Pathogenic effector functions of B cells in CNS autoimmunity |
| 16 | Jürg Müller MPI of Biochemistry | Chromatin mechanisms that preserve cell fate decisions |

Apr 23

| | | |
|----|---|---|
| 13 | Barbara Schraml-Schotta LMU – Biomedical Center | Dendritic cells from early to adult life – Do immune sentinels meet age-specific immunological needs? |
| 20 | Emilie Macé MPI for Biological Intelligence | Seeing the brain in action with ultrasound |
